DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: All references to copending U.S. patent applications must include the current status, whether patented, pending or abandoned.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gupta 4, 515,992 (Gupta) in view of "WINGTACK" Hydrocarbon Resins product data sheet ("WINGTACK").

Gupta teaches a cable comprising a conductor and a polymeric jacket surrounding said conductor and polyolefin adhesive bonding said conductor to said polymeric jacket, but does not teach the specific adhesive composition set forth by applicants. "WINGTACK" teaches adhesives of the type contemplated by applicants and can be added to other resins as a tackifier or processing aid. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the adhesive of Gupta by adding a "WINGTACK" composition to enhance the tack of the resultant composition and improve the flexibility as well as low temperature properties.

Art Unit: 1774

Therefore, the combined teachings of Gupta and "WINGTACK" would have rendered obvious the adhesive and cable as claimed in present claims 1-28.

No claims are allowed.
